

Kurash Competition Manager

One system for a championship: entry, accreditation, weigh-in, draw, live scoring on the mats, venue boards, medals and paperwork.

Written against the IKA competition rules

01

The competition day

The desk

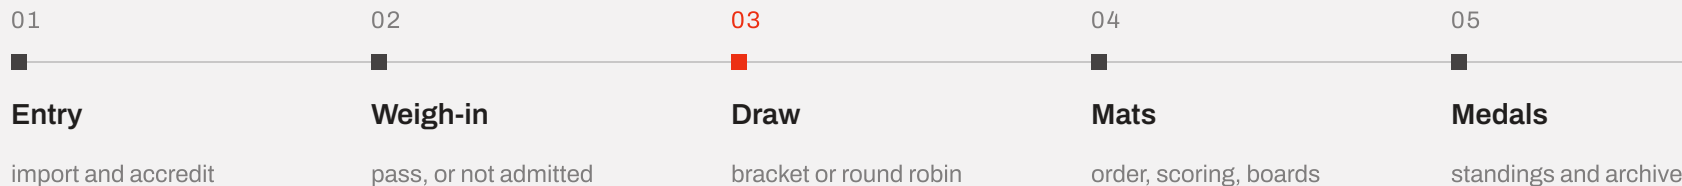

Blockers, not activity

A contest being fought is not a problem, so it is not listed here. The panel carries only what stops the event — an undrawn class, an athlete outside their weight, a mat with no referee — each with the screen that fixes it.

Every figure is a door

The counts link to the screens they are counted on, and the venue screens open in their own windows so the desk never loses its place.

The day, stage by stage

The application is arranged in the order an event runs, and each stage is gated by the one before it.

Registration and the entry spreadsheet

The importer reads twice

The first pass touches nothing and reports what every row would do. The second writes the rows that were ready, in one transaction. An official sees what is wrong before anything is saved, and a file that is half wrong still registers the half that is right.

Row numbers and country codes

Row numbers are the workbook's own, heading row included, so a bad row can be found in the file the official is looking at. IOC codes map to flags through a hand-kept table — BRN is Bahrain, IRI is Iran, KSA and RSA are not interchangeable.

The weigh-in window

CLASS	FROM	TO	60.4 KG	60.6 KG
–56	—	56.5	over	over
–60	55.5	60.5	made the class	has not
–66	59.5	66.5	under	under

The limit plus a 500 g tolerance above, the class below less the same tolerance underneath — derived from the division, so adding a class moves the one above it.

The scale

Championships > Asian Kurash Championship 2026 > Weigh-in

Men

Weigh-in

A 0.5 kg tolerance applies below an upper limit. Open classes have no upper bound.

4 Weigh-in

3 Passed

1 Out of order

Weight class: -60 kg

Rank	Name	Weight	Weight class	Weight tolerance	Status
1	Ali Alimov, Uzbek	59.8	-60 kg	0.2 kg	Passed
2	Gerdan, Uzbek	59.8	-60 kg	0.2 kg	Passed
3	Rashidov, Uzbek	59.8	-60 kg	0.2 kg	Out of order
4	Rashidov, Uzbek	59.8	-60 kg	0.2 kg	Not weighed

The rule is on the screen

The three figures follow the class filter, so they describe the list in front of the official rather than the whole category behind it. A measurement outside the window is named as such, not left as a number to interpret.

The confirmed list, on the spot

Once a class is filtered, its weigh-in form comes off the same screen in PDF or Excel — rendered when it is asked for, so the sheet a delegation is handed matches the scale.

02

The rules

Format by field size

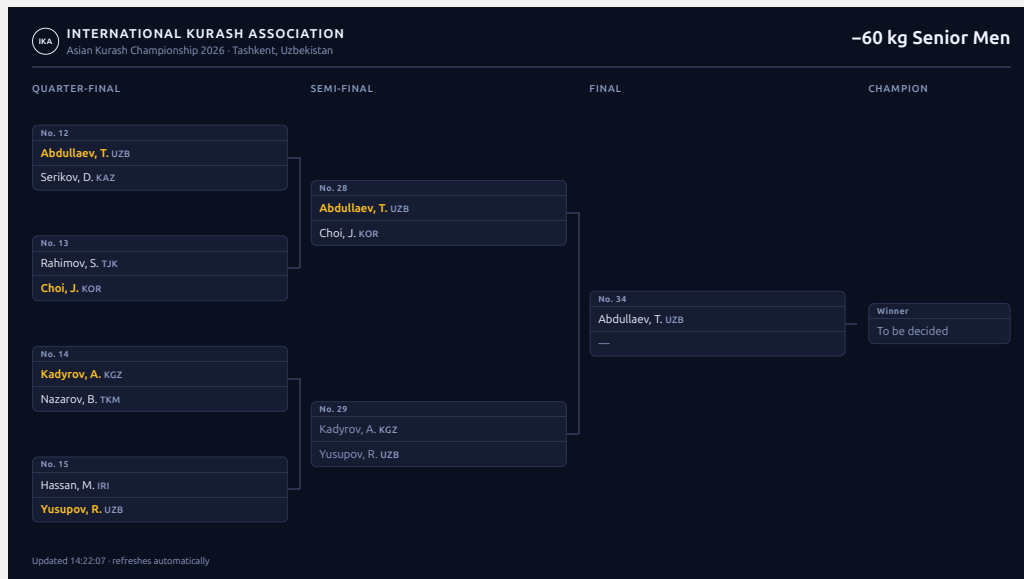

FIELD	FORMAT	DECIDED BY
1 athlete	Administrative placement	Signed for by an official
2–5	Round robin	The IKA rule, and the default
6 or more	Knockout	The IKA rule
2–5, knockout	Local decision against the rule	Administrator, reason, moment recorded

The format is re-checked server-side every time a draw is requested — a browser cannot ask for a round robin of sixteen.

The draw

- Eligibility is checked when numbers are handed out, when the bracket is generated and when the draw is published — all three ask the same class.
- The category is locked while it is drawn, so two administrators cannot draw the same class twice.
- A published draw is frozen: every display reads what the draw *was generated as*, never what today's entry list would recompute.
- The ceremony board runs announced or automatic, and refreshing mid-ceremony cannot move a single seat.

The bracket on a wall

One drawing, two audiences

The tree the officials work on and the tree the hall watches are the same geometry — each round a column, each slot an equal share of its height, so every connector hangs on a midpoint at any bracket size.

Read, not operated

Nothing here is pressed. A match carries two names, the number the running order gave it and nothing else; the tree scrolls rather than squeezing, because a round dropped off the right is a round nobody can see.

The running order

INTERNATIONAL KURASH ASSOCIATION Asian Kurash Championship 2026 · Tashkent, Uzbekistan						Fight order
#	CATEGORY	PHASE	BLUE	GREEN	MAT	WINNER
38	–60 kg Senior Men	Round of 16	Yusupov, R. UZB	Rahimov, S. TJK	Mat 1	Yusupov, Ruslan
39	–66 kg Senior Men	Round of 16	Choi, J. KOR	Nazarov, B. TKM	Mat 2	Choi, Jae-won
40	–52 kg Senior Women	Quarter-final	Karimova, N. UZB	Bekova, S. KAZ	Mat 3	Karimova, Nilufar
41	–60 kg Senior Men	Quarter-final	Abdullaev, T. UZB	Serikov, D. KAZ	Mat 2	
42	–66 kg Senior Men	Quarter-final	Choi, J. KOR	Kadyrov, A. KGZ	Mat 1	
43	–52 kg Senior Women	Semi-final	Toktogulova, A. KGZ	Erkinova, D. UZB	Mat 3	
44	–73 kg Senior Men	Quarter-final	Nazarov, B. TKM	Hassan, M. IRI	—	
45	–60 kg Senior Men	Semi-final	Abdullaev, T. UZB	Choi, J. KOR	—

Round-major, lightest first

Every first-round bout across all classes, then every second round — so classes progress together, and an athlete's own bouts fall apart naturally. Classes are ordered by kilograms, not by text.

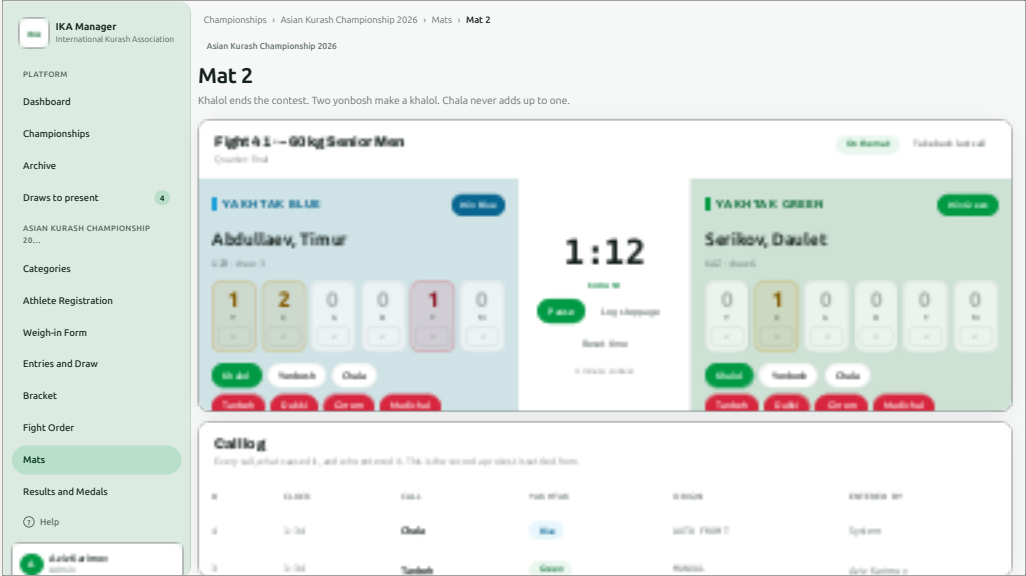

Two guarantees, both tested

A bout is always numbered after both bouts that feed it, with a minimum gap of three between them. Where a draw is too small to give that rest, the shortfall is reported so organisers can schedule a break.

Match calls

CALL	EFFECT
Khalol	Ends the contest
Yonbosh	Half a score; two make a khalol, however each was reached
Chala	The smallest score, and it never accumulates
Tanbeh	The opponent is given a chala
Dakki	The opponent is given a yonbosh; the superseded tanbeh's chala is taken back
Girrom	The contest is awarded to the opponent on the spot
Madichal	Transfers nothing; the third one loses the contest

On the mat

One press per action

Two corner panels in the athletes' own colours and the clock between them: the operator's eye lands on the same three places all day. Every counter carries its own minus, so a correction does not have to be counted backwards.

The record a protest is settled from

Each call is logged with the clock reading the press carried, what caused it, and who entered it. A withdrawn call is struck through with its consequences rather than erased.

“Scores are derived from events, never held in counters, so a call can be taken back and the tally recomputed to exactly what it would have been had the call never been made.”

— the match log is append-only; withdrawal appends, and nothing is ever rewritten

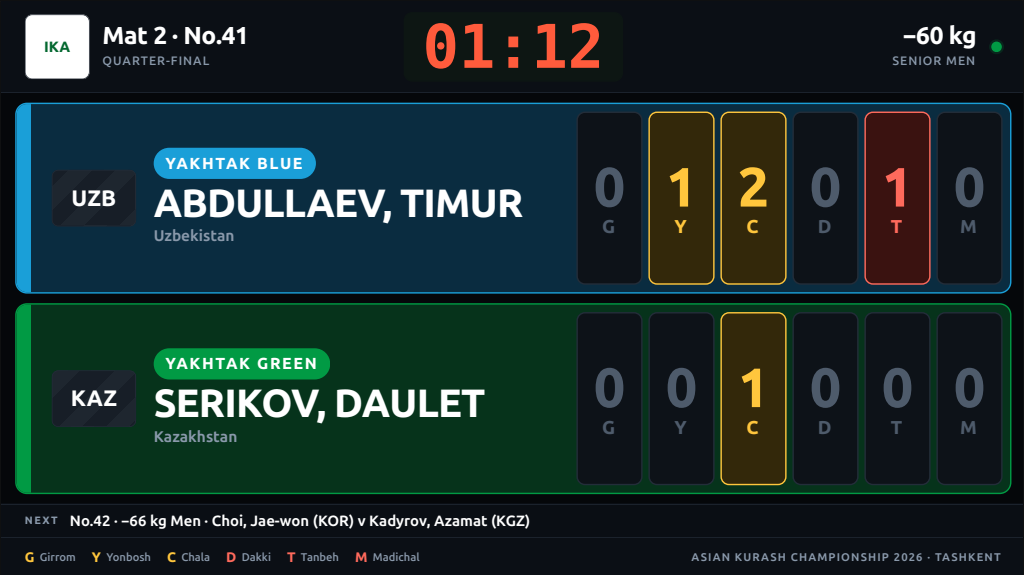

03

The hall

66/sec

A bracket polling every three seconds in front of 200 spectators is roughly 66 requests a second, each booting a framework and querying the database. That is what falls over at an event — not the data, which is tiny.

The mat scoreboard

Colour is the identifier

Each athlete gets a pane in the colour of their yakhtak — not two grey boxes with a coloured word on them. From the back of a hall the colour carries and the word is the caption.

Six counters, no khalol column

A khalol ends the contest, so an ended contest shows the winner instead. Counters at nought dim to the plate, the clock reddens for the last twenty seconds, and the dot beside the class says the feed is alive.

46	~57 kg Senior Women	Erkinova, D. UZB	Bekova, S. KAZ
47	~66 kg Senior Men	Kadyrov, A. KGZ	Rahimov, S. TJK
48	~73 kg Senior Men	Abdullaev, T. UZB	Nazarov, B. TKM

Updated 14:22:07 · refreshes automatically

No framework behind it

The hall's boards carry no Livewire and no JavaScript: they are served from cache and reload themselves, so a screen left running all weekend recovers on its own from a dropped network.

One version number

Every screen for a championship hangs off it. A recorded result bumps it and all of them are current on the next request — which is what keeps a room full of spectators from bringing the desk down.

Medal standings

INTERNATIONAL KURASH ASSOCIATION

Asian Kurash Championship 2026 · Tashkent, Uzbekistan

Medals

STANDING BY NOC				
NOC	G	S	B	TOTAL
UZB	4	2	3	9
KAZ	2	3	2	7
KGZ	1	1	3	5
IRI	1	0	2	3
KOR	0	2	1	3

-66 kg Senior Men	Serikov, D. KAZ	Rahimov, S. TJK	Hassan, M., Nazarov, B.
-52 kg Senior Women	Karimova, N. UZB	Toktogulova, A. KGZ	Bekova, S., Erkinova, D.
-57 kg Senior Women	Bekova, S. KAZ	Erkinova, D. UZB	—

Updated 14:22:07 - refreshes automatically

Derived, never cached

The standing and the podiums are computed from bout rows on every read, so the board, the certificates and the printed medal standing cannot disagree with each other.

One bronze in a round robin

A group has no second semi-final to lose, so the medal set follows the format the class was actually fought under rather than a single house rule.

Documents and paperwork

DOCUMENT	FORMATS	SCOPE
Athlete list · entries by NOC · by weight class	PDF · CSV · XLSX	Championship, or one delegation
Weigh-in form · draw sheet · draw numbers	PDF · CSV · XLSX	Weight class
Bracket sheet	PDF · XLSX	A tree, not a table — never CSV
Fight order · results · medal standing	PDF · CSV · XLSX	Championship
Certificates · accreditation cards	PDF	Championship, category or athlete

Twelve documents, rendered from the database at the moment they are requested — a re-download is never stale.

04

Adoption

Roles and gates

GATE	ADMITS	OPENS
manage-competition	Admin, supervisor	Entries, weigh-ins, draws, the fight order
score-bout	Admin, supervisor, referee	Every write on the mat screen
draw.publish	Admin, supervisor	Freezing a draw for presentation
draw.override_format	Admin only	Knockout in a round-robin field
athlete.sanction_age	Chief referee only	Signing a youth into an adults' competition

Seven roles behind fourteen gates. A referee is trusted with the result and cannot regenerate the draw it sits in.

What it takes to run it

The venue

One machine serving on the hall's own network, and the screens you already have: a tablet per mat, a laptop at the desk, a projector for the boards. No route off the network is needed at match time.

The rehearsal

A whole championship can be built to look at — every class entered, weighed, drawn and part-fought, with a contest live on each mat. The scoreboard driver has a fake, so a venue setup is rehearsed before the equipment arrives.

The safety net

Destructive database commands are blocked in four independent layers, backups run nightly and on demand, and nothing deletes a backup. Accounts can be recovered from one — a procedure that has been used.

1,555

Tests, with 5,019 assertions, all passing — feature tests drive the real screens against a real MariaDB, and whole tournaments are simulated end to end on every push.

Run a championship on it

The next step is a rehearsal in the hall: your entry spreadsheet, your mats, your boards — a full day fought on demonstration data before the first athlete arrives.
